Fermentation products Research Programme Manager

- Jobs / Partnerships - Job / Collaboration Offers -

Publication date: Friday 1 January 2021

Copyright © Objectif Sciences International - All rights reserved

Objectif Sciences International is looking for a project leader to create a new [participatory research](#) project on the theme of fermented products.

The theme can be approached from any angle (e.g. microbiology, anthropology, cooking, smell etc.) as long as the [participatory research](#) project is sound.

This participatory research project will take place all over the world, but will start as part of a vacation trip to Japan.

Example of possible projects :

- Deep understanding of effective micro-organisms effects on ecological balance and regulations
 - Comparison of the microbiological composition of different fermented products according to different factors (brand, fermentation process, etc.)
 - Study of the necessary and sufficient steps for the elaboration of a fermented product.
 - Study of the microbiological diversity present in homemade fermented preparations.
 - Impact of the various stages of manufacture of a fermented food on its physico-chemical and sensory characteristics (texture, color, smell, taste, composition ...)
- Non-exhaustive list, any project idea is welcome.

Your role :

- You actively participate in the conception of the coherent scientific research project and in its pedagogical adaptation in a scientific way.
- You ensure the follow-up and the realization of your project with your groups of volunteers. It is essential to find the right balance between scientific rigor and the necessary adaptation to your audience.
- You will conceive and implement a project to develop the program's activity for a holiday camp, whether it is on scientific and/or pedagogical aspects.
- You will develop scientific partnerships with research institutes
- You analyze the data collected in the field, and valorize them.

Profile :

- High level training in the field of the project
- Research experience
- Experience in project management is highly appreciated.
- Interest in pedagogy and education (experience in this field is a plus)
- Dynamic, proactive
- Entrepreneurial spirit
- Ability to work independently but also in groups
- Rigor and respect of deadlines
- Creativity

Requirements :}

- Be strongly motivated by the proposed work.
- Be really strongly motivated by the proposed work.
- Be willing to work very busy schedules at certain times.

Fermentation products Research Programme Manager

- Be willing to travel for various NGO meetings.
- Be willing to make a long-term commitment.
- Be willing to volunteer for the development of the project.

To submit your proposal please scrawl the page «[Submit your Profile to the NGO](#)»
