Fundraising Requests

A specialized Fundraising team can handle the preparation of fundraising applications necessary for your project. This way, you receive the funds for your project within OSI.

Use the forum function on this page to submit a brief description of the project you would like to have funded.

If known, specify the list of potential funding sources you might qualify for.

You will receive a response at your email address.

If you wish to handle your own fundraising application and related steps, you can benefit from successful practices found in the community of practice [conduite d'une année Sciences et Pédagogie](#).
