(see below for times according to your city)

Following the Ongoing Call for Proposals "[Creation of a Participatory Research Project](#)", this international webinar offers a very concrete presentation–debate to help all stakeholders design, structure, and accelerate Participatory Research with Impact.

Drawing on the **monograph of the projects** and a **practical roadmap**, the session will highlight the levers for strengthening results, funding implementation, developing audiences, and creating sustainable jobs. Interactive and multilingual (French, Spanish, English), the webinar will allow everyone to ask their questions and leave with solutions that can be activated immediately.

Co-organized by:

Geneva Forum x Objectif Sciences International x Terra Scientifica x Step & Go

Presentation–debate:

- Methods and tools,
- Intended for all stakeholders who want to **start, structure, or accelerate** a participatory research approach,
- Building results (jobs, audiences, operations, research progress...)
- By securing the continuity of projects over time.

The concrete and useful format of the session will enable all stakeholders present to get to know one another across the planet and introduce themselves to each other:

Agenda:

- **Opening** and welcome
- **Monograph of the projects** represented and **mutual presentations** (bringing together all projects resulting from the Ongoing Call for Proposals [“Creation of a Participatory Research Project”](#)).
- Major **strengths**, structuring **challenges**, and possible **acceleration levers** depending on the projects
 - methods,
 - implementation formats,
 - funding pathways,
 - partnerships,
 - dissemination,
 - scaling up

The goal is for each participant to be able to position themselves, compare themselves, and leave with solutions that can be concretely activated immediately within the context of their situation and projects.

This is a **rare and valuable opportunity**: not only will many solutions be proposed, but the session will be highly interactive, with the possibility to ask all your questions and obtain directly actionable answers and guidance. Exchanges will be open to contributions in the language of your choice.

Languages: Français • Español • English (interactive webinar provided in all 3 languages)

Date: Wednesday, May 27, 2026

Duration: 3 hours

Geneva–Paris time: from 4:00 p.m. to 7:00 p.m.

New York time: from 10:00 a.m. to 1:00 p.m. (EDT).

Santiago, Chile time: from 10:00 a.m. to 1:00 p.m. (CLT).

Nairobi time: from 5:00 p.m. to 8:00 p.m. (EAT).

Cairo time: from 5:00 p.m. to 8:00 p.m. (EEST).

Bangkok time: from 9:00 p.m. to 12:00 a.m. (the next day) (ICT).

Tokyo time: from 11:00 p.m. to 2:00 a.m. (the next day) (JST).

Tahiti time: from 4:00 a.m. to 7:00 a.m. (TAHT).

Register: if you want to benefit from concrete solutions, it is essential to attend.

To go further

This webinar is preparing, in particular, two structuring events.

- The Step One Participatory Science Hackathon, which will take place in August 2026 in Spain on the occasion of the total solar eclipse:
<https://www.training-for-development.com/In-August-Participatory-Science-Hackathon-ECLIPSE-Science-Climat-e-and-Humanity?lang=en>
- The Annual International Conference on Citizen Science and Fab Labs for Peace and Development, which will take place in December 2026 at the UN as part of the Geneva Forum:
<https://geneva-forum.com/Citizen-and-Participatory-Science.html> (2026 dates: Wednesday, December 9, as part of the Geneva Forum 2026 from December 7 to 11, 2026)
