WEBINAR ON CAREER OPPORTUNITIES WITHIN THE UNITED NATIONS ENVIRONMENT PROGRAMME

Objectif Sciences International (OSI), launched in 1992, has held Special Consultative Status with the UN (ECOSOC) since 1992 and has been a Major Stakeholder of the United Nations Environment Programme (UNEP) since 2025. As such, the Programme is inviting us to attend this webinar aimed at understanding career opportunities within UNEP.

The United Nations Environment Programme actively engages Major Stakeholders and other participants, including OSI as a Civil Society Organization, for their expertise, advocacy, and support. Their involvement in environmental policies and assessments enhances the legitimacy, public ownership, and effectiveness of actions for sustainable development. (read here: <https://sbe22delft.com/major-groups-stakeholders.html>)

UNEP is organizing a series of events showcasing projects carried out within the Organization. These sessions present career opportunities at UNEP and highlight the programmes the teams are working on to address the crises of climate change, nature and biodiversity loss, land degradation, and chemical and waste pollution.

You are warmly invited to take part in the event and to discover initiatives related to biodiversity and the marine environment.

Date: February 4, 2026

Time: 6:00 PM (Nairobi Time)

Format: Online (Zoom)
