## **The NGO adopts new statutes to support its evolution.**

---

On July 27, 2018, the association Objectif Sciences International, recognized as a Non-Governmental Organization, signed its New Statutes.

These Statutes were developed through a project led by the Working Group comprised of members of the Executive Committee, with a series of consultations and creative, reflective exchanges with all the Constituent Members of the NGO, Operations Directors, General Management, and several external observers.

You can view these Statutes on the [Statutes of the NGO Objectif Sciences International](#) page of this website.

After several years of internal testing (Internal Regulations), these Statutes now offer a well-structured organization and highly collaborative governance to an NGO present on all continents and creating new jobs every year.

If you wish to join the efforts of the NGO, please contact us!
