Each March, training in Project-Based Pedagogy Applied to Participatory Research dedicated to Education and Achieving the Sustainable Development Goals is offered by the NGO Objectif Sciences International.

Today, the format of Participatory Sciences has become essential and proves particularly relevant for fulfilling educational missions (schools, lifelong learning, leisure activities, etc.) and for addressing sustainable development challenges.

Duration: Depending on the sessions offered, from 3 days to 6 days
Format: hands-on training + webinars + lifetime access to e-learning resources
Cost: this training is currently offered at under 400 euros per person. With a value of 1,200 euros per person for 3 days, and 2,000 euros per person for 6 days, the remaining costs are funded by the NGO

You can find the full presentation and the **link to registration** for this training at this link [TRAINING in Project-Based Pedagogy Applied to Participatory Research dedicated to Education and Achieving the Sustainable Development Goals](http://www.educateur-scientifique.com/Science-Pedagogy-St1.html) [http://www.educateur-scientifique.com/Science-Pedagogy-St1.html].
